

SWE. Adalberto Cerrillo Vázquez

Full-Stack Software Engineer

City: Zacatecas, México | Phone: +52 492 205 4609 | e-mail: adalc3488@gmail.com | GitHub: github.com/AdalbertoCV

Digital Portfolio: portfolio-phi-ten-37.vercel.app | LinkedIn Profile: <https://www.linkedin.com/in/adalbertocerrillo/>

PROFESSIONAL PROFILE

Software Engineer with a proactive attitude to join work teams seeking to develop innovative and high-quality solutions, driven by a strong interest in continuous innovation and in shaping the technological future of the software industry through the use of cutting-edge technologies.

Interests & Creative Background

- **Interdisciplinary Innovation & Technology Foresight** – continuous exploration of emerging technologies and the integration of engineering, art, and business to build future-oriented solutions.
- **Music, Arts & Visual Expression** – creative thinking, pattern recognition, abstraction, and design sensitivity applied to problem-solving.
- **Literature, Cultural Series & Documentaries** – analytical reading, critical thinking, and a deep interest in history, society, and global perspectives.
- **Gastronomy, Cultural Experiences & Travel-Oriented Activities** – curiosity-driven exploration of food culture, creativity, and cross-cultural learning.
- **Sports, Social & Recreational Activities** – consistency, resilience, teamwork, community engagement, and sustainable performance mindset.

EXPERIENCE

Full-Stack Software Engineer – radii Manufacturing

(JUL 2025 – PRESENT)

- Designed and developed backend services powering core manufacturing workflows, improving system scalability and reliability.
- Built and maintained cloud workers on **AWS/Azure**, automating data processing tasks and reducing manual workload.
- Contributed to **React** frontend features, enhancing usability and product performance.
- Developed **AI Agents** using **LangGraph/LangChain**, automating decision-making processes and internal operations.
- Implemented **CI/CD pipelines**, automated deployments, and improved cloud observability across microservices.
- Developed and applied Machine Learning–driven automation solutions that improved internal workflows and boosted core business operations efficiency.
- Participated in software architecture and design discussions, contributing to a modern microservices ecosystem.

Freelance Software Engineer

(JAN 2025 – PRESENT)

- Participated in advanced software development projects for clients across diverse industries, delivering scalable and high-performance solutions.
- Worked on multidisciplinary developments integrating technology, business logic, and domain-specific knowledge across multiple areas of expertise.
- Collaborated with professional, cross-functional teams to design and implement innovative, state-of-the-art software solutions.
- Contributed to continuous innovation by applying modern architectures, emerging technologies, and best practices to solve complex problems.

Developer Intern – Council of Science, Technology and Innovation of Zacatecas (COZCyT)

(SEP 2023 – NOV 2024)

- Built internal software tools that supported administrative processes and improved data accessibility.
- Participated in agile development cycles, contributing to planning, design, and implementation phases.
- Developed web systems using **Django** and **React**, reducing manual workflows and improving operational efficiency.
- Continuous learning in the areas of full-stack development and project management.
- Training in software development through real-world projects.

EDUCATION

Software Engineer – Universidad Autónoma de Zacatecas

(AUG 2020 - DEC 2024)

Received my training at the Software Engineering Faculty of the Academic Unit of Electrical Engineering (UAIE).

SKILLS

Programming Languages and Technologies

- Python, Java, JavaScript, C#
- SpringBoot
- Django – Django Rest Framework
- React
- Docker
- CSS, Tailwind
- Git
- JWT auth, OAuth
- Cybersecurity and ethical hacking
- Asynchronous task flows
- Project Management Tools (Linear, Jira, Trello, Notion)
- AWS, Azure infrastructure
- Design Tools (Miro, Figma, Excalidraw, Vercel V0)
- Machine Learning and Automation
- DevOps CI/CD, Cloud Observability and Security
- AI Code Agents
- LangGraph, LangChain (AI Agents development)
- SQL Databases (MySQL, SQLite, Oracle, PostgreSQL)
- NoSQL Databases (MongoDB, Redis)
- Microservices
- Blockchain / WEB 3.0
- Mobile Development (Flutter, Dart)
- Game development, VR, animation & video editing
- Linux OS, Windows
- Distributed systems
- Event-driven architecture
- LLM systems & RAG
- Kubernetes + IaC
- Platform engineering
- Product & tech strategy
- IoT Fundamentals & Industrial IoT (IIoT)
- Edge Computing & Edge AI
- Real-Time Systems
- Digital Twins & Cyber-Physical Systems
- Stream Processing & Time-Series Analytics
- Optimization & Scheduling Algorithms
- Constraint Solving & Linear Programming
- Multi-Agent Coordination & Swarm Intelligence
- Control Systems (PID / MPC basics)
- Edge & Device Security (Secure Boot, OTA)
- FinOps & Cloud Cost Optimization
- Metrics-Driven & Experimentation-Based Engineering
- Rapid Prototyping & PoC Development
- Performance Analysis & Optimization
- Dynamic Programming
- Competitive Programming
- knowledge in fintech and investments
- Systems Thinking & End-to-End Solution Design

Additional Skills

- Teamwork
- SCRUM Methodology
- Project Management
- Software Documentation
- Robotics and advanced Manufacturing Background
- Fundamental networking and hardware knowledge
- Ownership Mindset
- Entrepreneurial and multidisciplinary mindset
- Data Modeling & Consistency Trade-offs
- Scalability & Capacity Planning
- Failure Mode & Risk Analysis
- Knowledge in exact sciences (mathematics, physics, chemistry, statistics)
- Technological innovation and transformative mindset
- Digital marketing vision and sales strategies
- Technical Decision-Making & Trade-off Analysis
- System Design & Architecture Thinking
- Metrics-Driven Engineering
- Reliability & Fault Tolerance Awareness
- Incident Analysis & Postmortem Practices
- Technical Debt Identification & Management
- Observability & Production Monitoring Practices
- Security-by-Design Awareness
- Training and mentoring
- Scientific and literary research
- Basic knowledge of mechanics and software integrations

LANGUAGES

- **Spanish** (Native)
- **English** (CI)

CERTIFICATIONS

- Web 3.0 ICP – ICP Hub Latam
- AI Agents (LangChain) – Platzi
- Emerging Technologies – Santander
